

READ TO SUCCEED

*We
develop a passion
for Teaching!*

INFINITY PODCASTS 1360

Did you know that hundreds
of successful
People have shared their
stories in
Books explaining exactly how
they
Achieved success yet so
many people
Don't read them how do you
explain that
One book could save you 5
years of trial
And error every successful
person I know
From all over the world is a
good reader
Their curiosity pushes them
to keep

Reading they are always
eager to learn
They just read read and read
some more I
Once heard someone say if
you want to
Hide wealth from the average
person put
It in a
Book that hit me hard not
because it was
An insult but because it was
the truth
Most people will complain
about their
Situation but they won't spend
an hour
Reading a book that could

change their
Life let me tell you a story
years ago I
Was broke frustrated and
looking for
Answers I asked my mentor
how do I get
Rich he didn't hand me
money he handed
Me a book at first I thought I
need
Money not words but he
smiled and said
Your BR because of what you
don't know
Learn what the wealthy know
and you'll
Have what the wealthy have

that's when I
Realized something money
doesn't come
Before knowledge it follows
knowledge
The millionaires the
successful business
Owners the investors they
aren't just
Lucky they think differently
because
They've learned differently
and most of
What they learned didn't
come from
School it came from
Books see life is like a game
and books

Are the instruction
Manual the wealthy know
how to play
Because they've studied the
rules the
Poor struggle because they
never took
The time to learn them so the
real
Question is will you will you
invest in
Your mind the way
millionaires do or
Will you keep hoping for
Success while
Ignoring the very thing that
creates it
I used to think success was

about
Working harder just putting
in more
Hours more effort but then I
met a man
Who is wealthy wise and
completely
Control of his life I asked him
what's
The secret he smiled and said
it's not
About working harder Jim it's
about
Thinking better that stuck
with me
Because here's the truth your
life is a
Direct reflection of how you

think if
Your thinking is limited your
life will
Be limited if your ideas are
small your
Results will be small and the
fastest
Way to expand your thinking
Read see most people live
inside a tiny
Mental box they believe what
they were
Taught as kids they think only
about
What they've seen and they
never
Challenge their ideas money
is hard to

Get success is only for lucky
people

I'll never be rich these
thoughts keep

Them trapped and because
they never feed

Their mind new ideas they
stay exactly

Where they are broke
frustrated stuck

But then you look at
successful people

And they're always learning
they're

Devouring books attending
seminars

Listening to mentors why
because they

Know that one idea just one
can change
Everything everything one
book can open
A door in your mind you
never knew
Existed one new way of
thinking can
Unlock opportunities you
never even saw
Before I remember the first
time I read
Think and Grow Rich by
Napoleon Hill it
Completely rewired my brain
I thought
Why didn't anyone teach me
this in

School it was like someone
handed me the
Missing piece of the puzzle
and that's
What books
Do they introduce you to
people you've
Never met strategies you've
never
Considered and and worlds
you never
Thought possible they break
down your
Limiting beliefs and replace
them with
Knowledge confidence and
power so here's
My challenge to you if you

want to be
Rich don't just work harder
think bigger
And to think bigger start
reading
Because the difference
between where you
Are and where you want to be
is just one
Idea away books are the
cheapest most
Accessible mentors you'll
ever have
Think about it where else can
you sit
Down with a billionaire a
worldclass
Thinker or a legendary leader

for just a
Few dollars you can't just call
up Henry
Ford and ask how he built his
Empire you
Can't invite Andrew carnegi
over for
Dinner and pick his brain
about wealth
Creation but their wisdom
their
Strategies their lessons they're
all
Waiting for you inside a book
I remember
The first time I picked up
How to Win
Friends and Influence People

by Dale
Carnegie I was struggling in
business
Struggling in relationships
and then
This book showed me EX
exactly how to
Communicate better how to
build stronger
Connections how to lead it
was like
Having Carnegie himself
coaching me and
The best part it cost me less
than a
Meal at a restaurant but here's
the
Problem most people won't

take advantage
Of it they'll spend money on
Entertainment on things that
give them
Nothing in return but they
won't invest
In a \$10 book that could
change their
Entire life they say I don't
have time
To read but they'll spend
hours
Scrolling on their phone
watching TV
Wasting time on things that
add no value
To their future the wealthy
know better

They understand that success
leaves

Clues and those Clues are
written down

Waiting to be discovered
every great

Leader every successful
entrepreneur

Every millionaire i've ever
met has been

A reader not because they had
to but

because they wanted to
because they knew
that the right book at the right
time

could save them years of
struggle so

here's the question if you
could sit
down with the greatest Minds
in history
and have them Mentor you
would you take
that
opportunity because that's
exactly what
books offer and the only thing
standing
between you and that wisdom
is whether
you choose to open the book
or not I
used to think that earning
more money
was just about working harder

but then I
learned something that
changed my
perspective forever your
income is
directly tied to your personal
growth
you don't get paid for time
you get paid
for the value you bring to the
marketplace and where does
that value
come
from
knowledge
skills

Insight the things you
learn every book you read

increases your
earning potential because it
sharpens
your mind expands your
thinking and
equips you with tools to solve
bigger
problems and let me tell you
the
marketplace rewards problem
solvers that's how you
increase your
value that's how you earn
more
more I'll never forget when I
first
picked up a book on sales I
was just

starting out in business
struggling to
make a living and then I read
a book
that taught me how to
communicate better
how to persuade how to close
deals
within a short time my
income
doubled same me same
industry just a
little more knowledge and
suddenly I was
worth more I once heard
someone say If
you think education is
expensive try

ignorance and they were right
the cost
of not knowing is far greater
than the
cost of any book some people
say I can't
afford to buy books but they
spend money
on things that don't serve
them the
question isn't whether you can
afford
books the question is can you
afford not
to read them the wealthiest
people in
the world understand this Bill
Gates

reads 50 Books A Year
Warren Buffett
spends hours a day reading
why because
they know that knowledge
compounds every book adds
another layer
of understanding another tool
in the
toolbox another step toward
financial
success so here's the
challenge start
reading like your future
depends on it
because it
does you don't have to read a
book a day

but commit to reading just a
little more
than you do now because the
more you
learn the more you grow and
the more you
grow the more you earn I
remember when I
first started making money I
thought the
key to wealth was just earning
more but
I quickly realized that making
money and
keeping money are two very
different
skills and keeping it growing
it that

requires financial
literacy financial literacy isn't
something they teach in
school not the
way it should be most people
graduate
knowing how to solve
algebraic equations
but have no idea how to
manage a budget
invest wisely or build wealth
and
because they don't know they
struggle
they spend everything they
earn they
fall into debt they make
financial

decisions based on emotion
rather than
knowledge and years go by
but nothing
changes because their
understanding of
money never
changes if you want to take
control of
your financial future you have
to start
by learning and where do you
find the
best lessons in books books
written by
people who have built wealth
who
understand money who have

mastered the
principles of Finance if
you've never
read a book on money
management on
investing on wealth building
start today
because what you don't know
is costing
you more than you realize I
once met a
man who made a great salary
six figures
but was always broke he lived
paycheck
to paycheck why because he
knew how to
make money but he never

learned how to
manage it then one day
someone handed
him a book on Personal
Finance he read
it applied what he learned and
within a
few years he had savings
Investments and
Financial Security the same
job the same
income just a different
mindset said
some people say I'll start
learning
about money when I have
more of it but
that's backwards you have to

learn
before you have money so
that when it
comes you know what to do
with it you
don't wait until you're
drowning to
learn how to swim you don't
wait until
you're wealthy to learn how to
manage
wealth the right book can
change your
financial future the right
knowledge can
set you free so start now
because the
sooner you learn the sooner

you earn and
the sooner you build life of
true
Financial Freedom I once met
a man who
told me he had read every
book on
success every book on money
every book
on personal development he
said Jim I
know everything there is to
know about
wealth so I asked him that's
great how's
your bank account looking
and he went
silent because while he had

read
everything he had done
nothing you see reading fills
your mind
with knowledge but only
action fills
your pockets with wealth
a book is a powerful tool but
it's just
that a tool and a tool left
sitting on
the shelf won't build
anything you have to pick it
up and use
it I remember when I first
started
studying personal
development I read a

book on goal setting it was
full of
ideas full of wisdom and I
thought to
myself wow this is incredible
but then I
closed the book and for weeks
nothing
changed and then it hit me
knowing what
to do and doing it are two
different
things so I went back opened
that book
again and this time I didn't
just read I
applied I wrote down my
goals set

deadlines and created a plan
and that's
when everything started to
shift the
wealthy don't just read books
they apply
what they read they take what
they learn
and turn it into strategies
habits and
decisions they don't just
absorb
knowledge they use it
because knowledge
alone doesn't create wealth
action does
a young man once asked me
Jim what's the

secret to success I told him
read books
learn everything you can and
then go do
it he
said that's it because I said
that's
it but here's the catch most
people
never do step two so don't just
be a
collector of
information don't let
knowledge pile up
in your mind without turning
it into
action read yes study yes but
then go do

something with what you've
learned because that's where
true wealth
begins I once heard someone
say if
you're lucky life will hand
you the
right opportunity at the right
time but
I found that life doesn't just
hand out
opportunities you have to
prepare for
them and one of the best ways
to prepare
is through books because
sometimes the
right book at the right time

isn't just
an opportunity it's a turning
point
think about this if you were
offered a
million-dollar business deal
today would
you be ready if you suddenly
had the
chance to invest in a once-in-
a-lifetime
opportunity would you know
what to do
most people think they need
more money
more connections or more
luck to succeed
but the truth is you need more

preparation and books are the
easiest
cheapest and fastest way to
prepare for
the success that's waiting for
you the
challenge
is most people don't realize
they need
the right book until until it's
too late
it's like standing in front of a
locked
door but never picking up the
key that's
been sitting on the table the
whole time
the answers are out there

waiting in
books filled with strategies
wisdom and
experiences from those
who've already
walked the
path the question
is will you pick up the right
book
before the opportunity comes
or will you
wait until the opportunity
passes and
then wish you
had I've met people who who
read a book
on investing after they lost
money in a

bad deal people who read a
book on
business after they failed their
first
company and people who
read a book on
Personal Finance after they
found
themselves drowning in debt
don't wait
until you're desperate to start
learning
get ahead of the curve feed
your mind
before life tests you because
life will
test you books are like seeds
you don't

plant them today and get
results
tomorrow you plant them
early you water
them you nurture them and
one day
they produce a harvest but if
you never
plant them at all you'll stand
in the
field of your life wondering
why nothing
is growing the right book at
the right
time can change your
thinking and if you
change your thinking you'll
change your

actions and when you change
your actions
well that's when everything
else
changes so what book will
you pick up
today.
